

Case Study Template

Demonstrating utility of FerriScan R2-MRI in clinical patient management in: (Condition)

Provided by: (Clinician name, Position and Organisation)

Section 1: Initial Observations:

- Age of patient and history
- Current and historical treatments and outcome
- Reason for concern
- Results of tests and investigations (other than FerriScan)

Section 2: FerriScan R2-MRI Result

- Liver Iron Concentration (LIC) mg/g dry tissue
- include LIC map and graph of iron distribution from FerriScan Report if possible
- Cardiac T2* result if applicable
- Conclusions

Section 3: Changes Implemented in Patient Treatment

- Result of changes if available

Section 4: Follow-up FerriScan (if applicable)

- Follow-up LIC result
- Other test results

Section 5: Discussion and Conclusion

- Specific utility of FerriScan as demonstrated by this case study
